

## Connect OpenAir to Power BI

Enhance reporting and analytics by transferring data either directly to Power BI or to a data source that stages data for Power BI to process. Whether pivoting data externally to better manage the details of your organization or populating dashboards to tactically approach big business decisions, integrating with Power BI can improve your business analytics across your professional services.

### What Data Is Exchanged?

Power BI can query virtually any table in OpenAir, providing up to real-time analytics of your Projects, Revenue, Time and Expense, Resourcing, AR, or customized areas within your system. Articulate data externally in a way that allows analysis without logging into OpenAir.

### Common Questions

*Can we send raw data from OpenAir tables to PowerBI to support dashboards and reports?*

Yes

*Do we need a 3rd party connector to integrate OpenAir with BI tools?*

No

## Benefits of OpenAir Integration Services

- Dedicated team experienced in OpenAir and integration best practices
- Leverage the strength of each systems intended purpose
- Improve speed at which information is available
- Increase communication accuracy across your business units

## Our Approach

We follow a simple and straightforward approach that delivers a superior solution.

1

### Business Model Alignment and Design

- Use of workshops to identify system ownership by department.
- Review of data ownership by system.
- Determine data workflows, frequency, and integration technology/software.

2

### Integration Build Out and Validation

- Gather field specifics from each system for mapping and transformation needs.
- Configure and connect integration technology to end systems.
- Establish use case and testing scenarios to confirm performance, design, error handling, and more.

3

### Deploy and Monitor

- Support migration to a production environment with live data.
- Assist with data alignment needs and system outage coordination.
- Establish monitoring activities to ensure continued success.

## Integration Tools We Use

We primarily utilize NetSuite OpenAir's native APIs to connect OpenAir to other systems. We also have deep experience with Dell Boomi AtomSphere® and NetSuite OpenAirCONNECT with additional leading integration products continually being evaluated and added to our tool set. Our integration experience combined with our expertise in NetSuite OpenAir allows us to help you quickly and smoothly design and implement the data integration exchanges for your specific PS business model.
